Recommender Systems

At the end of this lecture, you will be able to

- understand the problem definition and assumptions of recommender systems
- understand the impact of similarity measures in the K-Nearest Neighbor method
- understand the need to impose the low rank assumption in collaborative filtering
- ullet iteratively find values of U and V (given $X=UV^T$) in collaborative filtering

Discussion

Topic: Unit 2. Nonlinear Classification, Linear regression, Collaborative Filtering (2 weeks):Lecture 7. Recommender Systems / 1. Objectives
